

Group No: 06  
Date: 4/29/02  
Report No: 15  
Project Title: Wireless Cargo Container Tracking System

Group Leader: Andrew Nikow  
Advisor: Yu Dong Yao  
Sponsor/Client: Interpool

Project on Schedule: YES  
Hours Spent Last Week: 44

Weekly Status:

In the past week, all of the group's efforts have really come to fruition. On Wednesday, April 24 the group displayed the CCTS project at the 2002 Poster Day. In the coming days the group will hand in the final report and give the final oral presentation.

Poster day was a triumph for group 06. We spent the hours leading up to the event putting the finishing touches on our FTP application, making cut sheets for people to take as souvenirs, and preparing our posters. During the event Drs. Yao, Keating, and Bruno, all of who were proud to be affiliated with CCTS, visited the group. Representatives of Global Transport and the U.S. Coast Guard also visited the group. Both were interested in how our research and design could help bring supply chain management and security into the millennium.

The final report will be handed in on Monday, April 29.

Group 06 is scheduled to give its final oral presentation on Tuesday, April 30.
