

EE/CpE 415/423 – 416/424  
2002 Fall – 2003 Spring  
WEEKLY STATUS REPORT

Group No.: 15

Date: December 2, 2002

Report No.: 11

Project Title: Real-time Wireless Sensor Network – Signal Analysis for Security Applications

Group Leader: Mark Woolley

Advisor: Prof. Tureli

Sponsor/Client:

Number of Hours Spent on Project by Group in Past Week: 30

Project on Schedule: YES

This week we made a lot of progress on our project. We met with Professor Tureli on Tuesday (just before the break) and discussed the parts we ordered and the upcoming final presentation. Eric had ordered our parts last week but there was a problem so Professor Tureli had to resubmit the order on Tuesday. The group is anticipating the parts arrival within 2 weeks, at which point we will begin assembling them. Also, we started coding for our project in Matlab and began working on the final report for our project. This week we have a final presentation for E421 and next Tuesday we have our presentation for Senior Design, so the group will be meeting to meet both of those deadlines.
