

EE/CpE 415/423 – 416/424
2002 Fall – 2003 Spring
WEEKLY STATUS REPORT

Group No.: 15

Date: October 21, 2002

Report No.: 5

Project Title: Real-time Wireless Sensor Network – Signal Analysis for Security Applications

Group Leader: Mark Woolley

Advisor: Prof. Tureli

Sponsor/Client:

Number of Hours Spent on Project by Group in Past Week: 40.5

Project on Schedule: YES

This week was the week dedicated to the completion of our proposal. Much work was performed by all of us. Rebecca worked on the project schedule and financial budget. Eric worked on the design requirements. Steve worked on the introduction while Justin worked on the design approaches as well as the financial budget. I worked on the abstract and conclusion of this report. In the end we all proof read it and it was met by our approval. I still need to get all of our signatures on it as well as our advisor. This week we plan on meeting with our advisor and seek information on what design approach we should start ordering parts for.

Also we have been working on our EE 421 class, engineering economics class, which we are required to come up with a business model which also helps us for our senior design final report.
