

EE/CpE 415/423 – 416/424
2002 Fall – 2003 Spring
WEEKLY STATUS REPORT

Group No.: 15

Date: October 21, 2002

Report No.: 7

Project Title: Real-time Wireless Sensor Network – Signal Analysis for Security Applications

Group Leader: Mark Woolley

Advisor: Prof. Tureli

Sponsor/Client:

Number of Hours Spent on Project by Group in Past Week: 20

Project on Schedule: YES

This week we met up to discuss about our future deadlines and tried to meet with our advisor to gain insight on what final approach we should take on our project. We sent out about 3 emails and waited for him during his office hours, but he did not reply to us or he was unavailable during his office hours. We started to work on final parts list but couldn't come up with a final one due to our unavailability of our advisor. More links were put on our web page also.

This week, we plan on meeting with our advisor to come up with a final design approach and get a finalized parts list.
