

EE/CpE 415/423 – 416/424
2001 Fall – 2002 Spring
WEEKLY STATUS REPORT

Group No. : 18 Date: 2/9/2003 Report No.: 14

Project Title: Cell Card – Brew based application

Group Leader: Robert Lee Advisor: Yao

Sponsor/Client: _____

Number of Hours Spent on Project by Group in Past Week: 5

Project on Schedule: YES NO _____

Weekly Status:

- We have been meeting 3 times a week to complete our advisor Demo requirements, and we seem to be having some problems with the code.
- We are currently still developing a menu system, and also links that the user can use to link them to various websites. We are also trying to create a send receive program that will work with picture as well as data.
- Another application we have come up with is Stevens Parking Trak. Where we will use BREW to detect how many parking spots are available in the Parking lot, using the Cell phone. And it can even take a picture of the lot so you can see where you would like to park.
- We will start developing this application as soon as we get our main demo part working.
