

EE/CpE 415/423 – 416/424
2001 Fall – 2002 Spring
WEEKLY STATUS REPORT

Group No. : 9

Date: 04/28/03

Report No. : 26

Project Title: Missile Course Deviation

Group Leader: Zhanna Lasun

Advisor: Professor Sumit Ghosh

Sponsor/Client: _____

Number of Hours Spent on Project by Group in Past Week: 70

Project on Schedule: Yes

During past week the group met to finish posters' design. The files had been submitted to TA and printed using the ECE department's printer. The posters, prototype, simulation and other equipment needed for our final presentation are prepared and ready to go this Wednesday, April 30th.

Maile and Zhanna finished working on the simulation of the design concept. The simulation was done using 3DS MAX 4.

Luis and Ana used their creativity and finished the hard back side of the posters using kitchen tile. The prototype was painted black and yellow to look presentable for the Senior Design day this Wednesday. Luis and Ana have been working on the final report as well.

The group is meeting tonight to clarify all the details about set up and the presentation itself and also to finish up the report.

Zhanna have been updating the website with fresh material. The video from testing of the prototype will be posted soon. 3D animation and final report will be posted by the end of this week as well.
