Weekly status:
<p>The group has obtained two 5400 series DSP chips from Texas Instruments free of charge. We are also exploring the Bluetooth solutions from TI and are currently in contact with a representative who may either provide us with a Bluetooth chip and/or other possible third party Bluetooth solutions.</p> <p>In addition to this, we are currently reading the documentation on the 5400 series chips in order to determine how to interface to the chips to upload programs. The group is currently looking for a QFP pin converter so that the chips can be easily mounted on a prototype test board. Additionally, we are reading the documentation to find out what kind of memory will be suitable to interface with the DSP chips.</p>
