Weekly status:
<p>This week, the group began writing the Interim Progress Report. Many aspects of last fall's Final Design Report had to be changed and updated, due to the new scope of the project. The client/admin subgroup has been researching Visual Studio .Net, as this is to be the programming platform used. The database subgroup continued to tweak the database in order to assure its robustness and completeness.</p> <p>In the next week, the group will begin testing Cross Match's MV5 BCS scanner and its connectivity to the laptop. The group also plans to begin coding the client/admin systems.</p>
