Weekly status:

- The group spent most of the time in the lab testing the comblock assembly. The following tasks were performed:
 - o Used a receiver assembly to collect random noise and plotted it in matlab
 - o Switched the transmission frequency between 2.4GHz and 902MHz by manually setting the necessary registers and checked to see if it was transmitting at the specified frequency using the spectrum analyzer
 - o Set up an IP address for the comblocks for remote access
