Weekly status:
<p>We were finally able to get our hands on an old HC11 microcontroller for the semester. A visit to radio shack and the purchase of solder and wires gave us the necessary tools to begin on the hardware end.</p> <p>We met and began to attempt to program a small switch alert on the HC11 and breadboard but were unsuccessful at the first attempt. We will meet again and continue the journey of assembly language next week.</p>
