<b>Weekly status:</b>
<p>This week was a normal one in the life of the project. There was a group meeting on Monday and an advisor meeting on Tuesday. Nothing has really changed in our plan since last week, which is a good thing this late in the project. Things are progressing according to the schedule we laid out. I am still preparing to have to make emergency damage control measures, but thankfully have not had to just yet.</p> <p>My strategy at this point is to hope for the best and prepare for the worst. We need to start working on presentation materials, such as the poster board, and start thinking about what sort of things we will present. The prototype is important, but it's time we thought about the presentation too.</p>
