**Weekly status:**

This week turned out differently than I expected. First of all, we did not meet with Prof. McNair because of an all-inclusive, all-day faculty meeting. I had expected this development to impede progress on the project. However, the group seemed to manage itself for a little while, and didn't come running to the leader or the advisor at the first little sign of trouble.

Each of the group members splintered off and worked on small problems. Zach is researching ideas for the extra credit project, as well as thinking about build schedules. Rich is trying to resolve the issue of processor interface. I'm trying to figure out how the whole thing will fit together, and Shiela set up an administrative process for our finances. I'm proud of the group for this week.
