

## 2008 Senior Design Poster Dimensions

Posters are already set up as tri-fold with the following dimensions:

- center section is 36" high x 24" wide (portrait mode)
- two side sections are each 12" wide

Prepare the center section for printing in Burchard 200 and coordinate printer use with TA, Mary Schurgo (mschurgo@stevens.edu). When creating the center section, be sure to adjust the dimensions within the illustrating tool based on the guidelines above. Convert your file to pdf. When your group comes to print, bring the pdf and original file type (you will not be able to access your email from the lab). Last year groups were most successful printing directly from PowerPoint.

8.5" x 11" letter sized printouts can be used to populate the side sections and should be printed by individual groups.
